Why was it important?	 1、系爭專利係關於一海水處理方法及裝置之發明專利,舉發人針對 全部請求項提出舉發。於智慧財產局期間雙方並申請面詢。智慧財產 局早先原公開心證表示本案應不具新穎性及進步性,惟經由本所於面 詢時向審查委員詳細說明系爭專利與諸舉發證據之的差異,並多次提 出答辯理由說明,最後審查委員完全接受本所之論點,作成舉發不成 立之處分(本所客戶勝訴)。舉發人嗣後雖不服智慧局之處分而向經濟 部訴願審議委員會提起訴願,訴願會仍維持智慧財產局之處分而駁回 被舉發人之訴願(本所客戶勝訴)。 2、本案之爭點在於舉發證據雖然揭露「裝置最終出口(排放至海洋) 之pH 值」係大於 6.5 之數值,然該數值乃單純為了對應中國之海水 排放數值,而非舉發證據之發明人為獲致裝置小型化所研究分析而獲 得之最佳數據,是否可因為單純數值恰巧相同即可證明係爭專利不具 新穎性及進步性?過去我國智慧局長久以來存有上述錯誤的思考邏 輯,導致舉發人可任意憑藉舉發證據所揭露之數據資料,而不論該數 值之所以界定所存在的技術思想,即可成功撤銷他人之專利。本案審 理之初,審查委員亦抱持相同的見解,然經由本所律師的論理說明, 導正了審查委員於邏輯上的盲點,最終為本所客戶取得勝訴。 1. The patent in issue is an invention patent on certain seawater treatment method and device. The German maker challenged every claim of the patent. In the proceeding, both parties requested to communicate to the examiner face-to-face. Before our interview with the examiner on behalf of our client, Taiwan IPO openly expressed the patent in issue might be considered lack of novelty and inventive step. We successfully pointed out and explained in detail to the belief of the examiner during the interview the difference between the patent in issue and the evidence cited by
	 the challenger and reiterated our defence in the written statements that followed. The German maker's invalidation attempt thus failed and on its appeal, the Appeal Board let stand Taiwan IPO's decision holding the invalidation sought for groundless. 2. The focus of our argument is the patented device's pH value at the end of the discharge (i.e. at the exit to the ocean). Much as the invention cited specifies the cited patent has a pH value of 6.5, said value is in fact given in consideration of the pH value of seawater

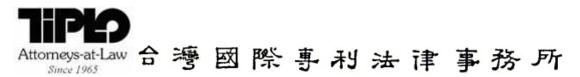

discharge standard required by the Chinese government. In other words, it is not the optimal value attained in the course of the
research and analysis performed by the inventor with a view to
downsizing the device. The question is then: Does the
concurrence of the pH value specified in the patent in issue with that
of the cited invention indisputably justify the allegation that the
patent in issue lacks novelty and inventive step? Taiwan IPO has
been questioned for its logic and reasoning for invalidating a patent
by reason of the numeric value disclosed in the cited prior art without
looking into the technical concept leading to the definition of the
numeric value cited. In this invalidation case, the Taiwan IPO
examiner in charge had initially given the challenger's argument a
good thought by reason of the cited pH value but we successfully
argued to overturn the above questionable logic and reasoning and
reverse his opinion and our client's patent in issue stands.

	(Further to the case as profiled above) With respect to the main

	decided against the accused, demanding that the accused cease
	the infringement, destroy the materials and semi-finished products
	seized subject to the provisional injunction executed, and pay
	damages in an amount of TWD13,000,000.
	侵權人於本件訴訟中提出先前技術主張系爭專利有應撤銷之事由,並

	During the proceeding of this action, the accused had once
	presented prior arts to challenge the validity of the patent in issue
	and denied the infringement alleged against it by arguing that it
	simply sold metal parts, not finished products.
	智慧財產法院於審酌後,認為侵權人主張之先前技術,無法使系爭專

	The IP Court examined this case and held that the prior arts
	presented by the accused did not negate the non-obviousness of the
	patent in issue. Also, the IP Court determined the existence of the

	taken during the proceeding of evidence preservation and the seized
	semi-finished products. In accordance with the descriptions with
	respect to product designation in the accused's export declaration

	in the act of manufacturing and selling the accused product in
	Taiwan and that the accused's argument about its sale of only the metal parts should not be admissible. The IP Court also calculated
	the amount of awarded damages based on the quantity indicated in the export declaration document and the unit price asserted by the
	client.

	必要。 By operation of the rules of construing the patent claims, according to the court, if the person skilled in the ordinary art do not know or understand the language used in the patent claims, the definition(s) provided in the specification and drawing(s) should be first taken as reference. Alternatively, the purpose, the intended solution and use of the subject invention as set forth in the specification and drawing(s) may help in understanding the meaning of the language used in the patent claims because the specification and drawing(s) are to disclose and describe the content of the subject invention. Thus, patent claims should be construed in accordance with the specification and the drawing(s) for understanding the content of the subject invention. However, if the meaning of the language used in the patent claims remains questionable, the file history from patent prosecution to patent right maintenance (intrinsic evidence) may be taken into account to determine and know the patent claims approved by the patent agency, in which case, the patentee would be barred from change or reverse his/her previously expressed standing since such change or reversion would accordingly cause the scope of patent right to be indefinite and thus impede public interests. Therefore, it is reasonable that the scope of patent right for the subject invention should be subject to the intrinsic evidence. Further, if the scope of patent claims still cannot be determined by reference to the above-mentioned intrinsic evidence, including specification and drawing(s), the patent claims should be construed by reference to the evidence or rules other than the aforesaid
	intrinsic evidence (namely, extrinsic evidence). In other words, it
	would be unnecessary to take into consideration the extrinsic evidence or other rules if the intrinsic evidence is sufficient enough

	decided against the accused, demanding that the accused cease
	the infringement, destroy the materials and semi-finished products
	seized subject to the provisional injunction executed, and pay

	侵權人於本件訴訟中提出先前技術主張系爭專利有應撤銷之事由,並

	During the proceeding of this action, the accused had once
	presented prior arts to challenge the validity of the patent in issue
	and denied the infringement alleged against it by arguing that it
	simply sold metal parts, not finished products.
	智慧財產法院於審酌後,認為侵權人主張之先前技術,無法使系爭專

Main Issue

The main issue for the instant case is whether or not the disputed trademark is similar to the cited trademark and it is likely to cause confusion to relevant consumers.

The IPO in the Opposition Unfounded Decision reasoned that the cited trademark is known for timepieces and related products, however, the disputed TM "U (device)" Reg. No. 01585597 is composed of "U", alike the Japanese character "ひ" while the cited trademark is a composition of the Greek symbol " Ω " and "OMEGA" arranged in two lines: the level of similarity is low: they are respectively distinctive; the disputed trademark has been used on jeans since 2002 and registered consecutively in other countries; the trademarked clothing is marketed and promoted in Taiwan so that there is no free-ride on the cited trademark; the disputed trademark was not filed out of bad faith; the disputed trademark and the cited trademark would not cause confusion and misidentification. Holding the same ground, the MOEA dismissed the administrative appeal filed by the Opposer. However, the IPC opined that the disputed trademark is like Ω device of the cited trademark placed in opposite direction; the disputed trademark could be presented or viewed in opposite direction depending on how the products are displayed in marketplace; under such situation, the disputed trademark will bring consumers similar impression to Ω device of the cited trademark so as to constitute close similarity between the disputed trademark and the cited trademark; since the disputed trademark is less famous than the cited trademark and both trademarks are designated for use on the same or similar watches, clocks, chronometric instruments overlapped in sales places, in view of above factors, the disputed trademark is likely to cause confusion and misidentification to relevant consumers and should not be

ti a	granted registration, even though it was not filed out of bad faith by the Applicant; therefore, the original decision and the administrative appeal decision should be revoked and the disputed trademark
/ c	should be cancelled. In disagreement with the judgement, the Applicant initiated an appeal with the SAC but the appeal was dismissed on basis of not substantially explaining how the IPC's udgement is unlawfully constituted.

	The main issue for the instant case is whether or not the disputed trademark is distinctive. The reasons the IPC considered the disputed trademark is quite distinctive are:
	1. TM * (Alibaba cloud logo) owned by the Applicant comprising the slightly different Chinese character "云" alone and designating for use on the same goods and services was considered distinctive by the IPO and granted registration as No. 1480915. Based on administrative self-restraint rule, it is hard to say that the disputed trademark is not distinctive.
	 2. "云" has several definitions in dictionary: 1) say; 2) so or etc.; 3) used in ancient poems; 4) same as "雲"; 5) a surname. These definitions have no connection with the designated goods or services of the disputed trademark. The disputed trademark does not describe quality, utility or other characteristics of the designated goods or services nor convey any idea relative to the designated goods or services, thus should be considered arbitrary. 3. The disputed trademark is a special design of a Chinese
	 character. Such a picturized design is impressive enough to make consumers associate with a trademark and should be quite distinctive. 4. General consumers would think the single Chinese character "雲" refers to cloud. Such a character used alone could not be associated with cloud computing at all.

	The Opposer filed an opposition against TM Möbius Reg. No. 1514875 owned by the Applicant. The Intellectual Property Office (IPO) considering no conflict between the two parties' trademarks made an Opposition Unfounded Decision. The Opposer in disagreement with the decision instituted an administrative appeal with the Ministry of Economic Affairs (MOEA). After examination, the MOEA in the administrative appeal decision on basis of the similarity between the two trademarks determined "the original"
	decision is hereby cancelled; the original deciding agency (IPO) should make a proper decision instead". The IPO following the administrative appeal decision made a fresh decision. As the Applicant did not institute an administrative appeal against the decision, cancellation of the disputed trademark is ascertained.
