

## **Procedures to file a request with the Taiwan Intellectual Property Office (TIPO) for Patent Prosecution Highway (PPH) Program between TIPO and the Japan Patent Office (JPO)**

Amended and enacted on May 1, 2020

The Patent Prosecution Highway (PPH) MOTTAINAI program enables an application, whose claims have been determined to be allowable/patentable in the Office of Earlier Examination (OEE), JPO, to undergo an accelerated examination under the PPH in the Office of Later Examination (OLE), TIPO, with a simple procedure according to a request from an applicant.

The PPH MOTTAINAI program between TIPO and JPO will be fully implemented on May 1, 2020.

### **1. Request with TIPO for accelerated examination under PPH**

An applicant should file a request for accelerated examination under the PPH with TIPO by submitting a completed “Request for Accelerated Examination under TIPO-JPO PPH Program” request form accompanied by the relevant supporting documents. The requirements for filing accelerated examination with TIPO under the PPH are given in paragraph 2. Relevant supporting documentations and procedure for accelerated examination under the PPH program at TIPO are discussed under paragraphs 3 and 4. The PPH request form is available on TIPO’s web site, <https://topic.tipo.gov.tw/patents-tw/cp-721-870867-dfb82-101.html>.

### **2. Requirements for requesting accelerated examination under the PPH Program at TIPO**

There are four requirements for requesting accelerated examination under the PPH program at TIPO. These are:

**a) Both the TW application on which PPH is requested and the JPO application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).**

For example, the TW application requesting PPH must meet one of the following conditions:

- (i) an application which has validly claimed priority under Taiwan’s Patent Act §28 to the JP application(s) (see Figures A, B, C and D in Annex 1), or
- (ii) an application which has validly claimed priority under Taiwan’s Patent Act §28 to the PCT application(s) without priority claim (see Figures E and F in Annex 1), or
- (iii) an application which provides the basis of a valid priority claim under Japan’s

National Law for the JP application(s) (see Figures G, H and I in Annex 1), or  
(iv) an application which shares a common priority document with the JP  
application(s) (see Figures J and K in Annex 1).

The program is not applicable to utility model applications and design applications.

**b) At least one corresponding JP application has one or more of those claims that have been determined to be allowable/patentable by the JPO**

Claims are “determined to be allowable/patentable” when a JPO examiner clearly identifies the claims to be allowable/patentable in the latest office action, even if the application has not been granted for patent.

The office action may be either:

- (a) Decision to Grant a Patent
- (b) Notification of Reason for Refusal
- (c) Decision of Refusal
- (d) Appeal Decision

For example, if the following routine expression is described in the “Notification of Reason for Refusal” of the JPO, then the claims are explicitly identified to be allowable/patentable.

“<No reason for refusal has been found for Claims >

At present, no reason for refusal is found for invention concerning Claim\_\_.”

**c) All claims on file, as originally filed or as amended, for accelerated examination under the PPH must sufficiently correspond to one or more claims indicated as allowable in JPO**

Claims shall be considered sufficiently corresponding where, accounting for differences in translations and claim format, the claims on file are of the same or similar scope as the claims in JPO, or the claims on file are narrower in scope than the claims in JPO. In this regard, a claim on file that is narrower in scope occurs when a JPO claim is amended to be further limited by an additional technical feature that is supported in the specification (and/or claims). When possible, the claim on file should be presented in dependent form.

A claim in TIPO that introduces a new/different category of claims to those claims indicated as allowable in the JPO is not considered sufficiently corresponding. For example, where the JPO claims only contain claims to a process of manufacturing a product, then the claims in TIPO would not be considered sufficiently corresponding if the TIPO claims introduce product claims that are dependent on the corresponding process claims.

**d) The applicant has been notified that a substantive examination will begin**

**shortly; and TIPO has not issued a first examination report on the application**

**3. Documents to be submitted for accelerated examination under the PPH program:**

Documents (a) to (d) below should be submitted by attaching to “Request for Accelerated Examination under the PPH Program”. The request form is in Annex 2.

**a) A copy of all office action(s) relating to the corresponding JPO application(s) and translations of them if they are not in English**

The translated copy could either be in Chinese or English. The applicant does not have to submit a copy of JPO office actions and their corresponding translations if these documents are provided via JPO’s dossier access systems (AIPN system or One Portal Dossier (OPD) on J-platpat web page), since the office actions and their machine translations are available for TIPO examiner via the JPO’s dossier access systems. If these documents could not be obtained by TIPO examiner via the JPO’s dossier access systems or if it is impossible for the examiner to understand the outline of the translated office action due to insufficient translation, the applicant may be notified and requested to provide the necessary documents.

**b) A copy of the claims determined to be allowable/patentable by JPO, and their translations if they are not in English**

The translated copy could either be in Chinese or English. The applicant does not have to submit a copy of claims indicated to be allowable/patentable by JPO and translations thereof when the documents are provided via JPO’s dossier access systems, since the claims and their machine translations are available for TIPO examiner via the JPO’s dossier access systems. If these documents could not be obtained by TIPO examiner via the JPO’s dossier access systems or if it is impossible for the examiner to understand the outline of the claims due to insufficient translation, the applicant may be notified and requested to provide the necessary documents.

**c) Copies of the references cited by the JPO examiner**

If the cited references are patent documents, submission is not necessary, as they are usually available to TIPO. If TIPO could not access these relevant patent documents, the applicant must then submit these documents at the request of TIPO. If the cited reference is a non-patent literature, the applicant has to submit it.

A translation of the references is not required.

**d) A claim correspondence table**

The applicant must submit a claim correspondence table which explains the claims of

the TIPO application for accelerated examination under the PPH program are sufficiently corresponding to the claims determined to be allowable/patentable by JPO.

If the claims on file do not sufficiently correspond to one or more claims determined to be allowable/patentable by JPO, but the applicant would like to amend the claims to sufficiently correspond to the allowable/patentable claims in the JPO application(s), the applicant should amend the claims to fully comply with the corresponding terms at the same time as the request for expedited examination under the PPH program. The claim correspondence table is given in Annex 3.

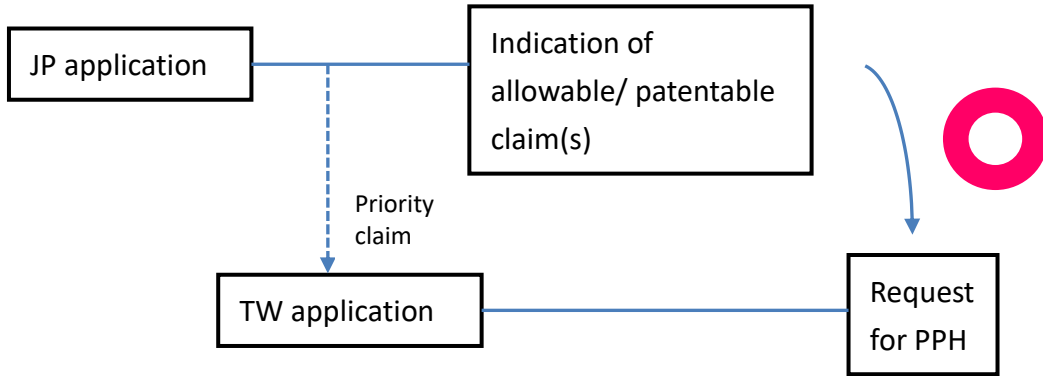

#### **4. Procedure for accelerated examination under the PPH Program at TIPO**

The applicant files a form requesting accelerated examination under the PPH program with TIPO, including relevant supporting documents. If the requirements are met, TIPO will conduct the accelerated examination. If the application does not qualify for participation in the PPH program, the applicant will be notified accordingly and given opportunity to perfect the request. If not perfected, the applicant will be notified and the application will await action in its regular turn.

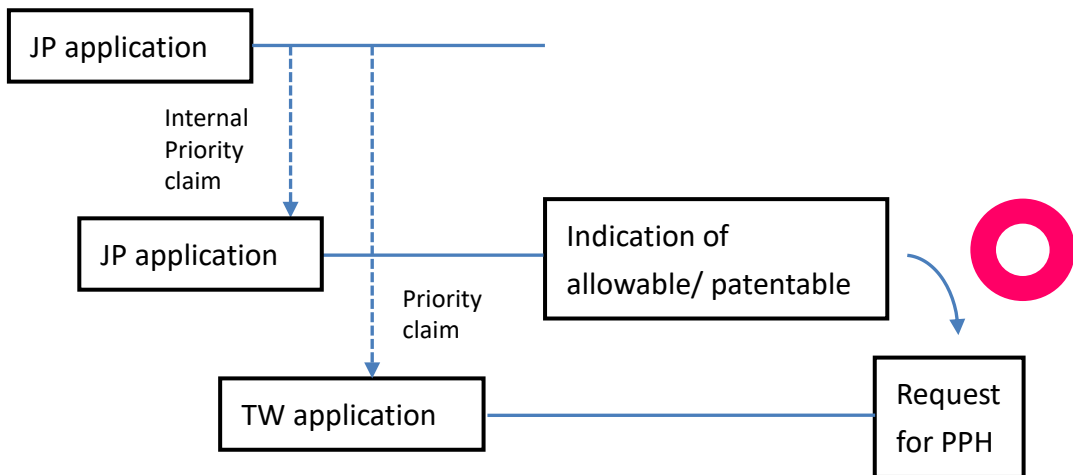

The applicant must use the “Amendment Request Form under the PPH Program” (Annex 4) to make amendments during and after the request for expedited examination under the PPH program. Other relevant documents must also be specified in terms of their connection to the request for PPH to ensure prompt and proper processing by TIPO.
